

How to Assemble

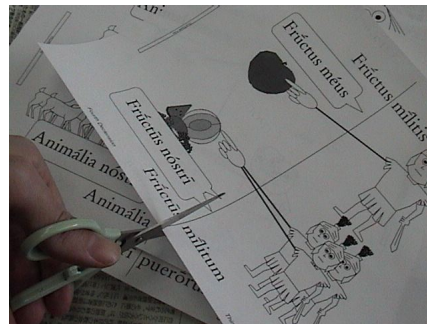

This is just one way to assemble this visual.

I

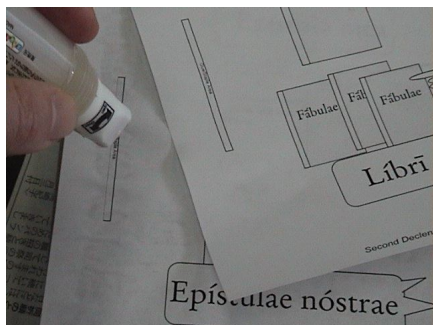

(Optional--but a good idea)
Glue the first page to piece
of cardboard

II

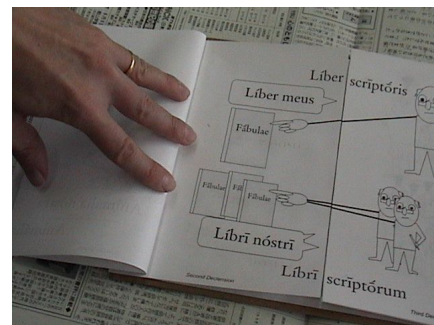

Cut the other pages along
the center line

III

Apply glue to the edges and
lay the pages down. The
order is not necessarily
important, but matching up
the lines is.

IV

(Optional--but a good idea)
Give your pages a crease.

The Finished Product
